

Full Name: Professor Alfred Ngowi

Institution/Organisation: Central University of Technology (CUT), Free State

Based In (Country): South Africa

Prof. Alfred Ngowi is the Deputy Vice Chancellor – Research, Innovation and Engagement at the Central University of Technology, Free State. Before this position he was the dean of the Faculty of Engineering and Information Technology.

He holds a Bachelor of Science (Civil Engineering) from the University of Dar es Salaam, Tanzania; a Master of Civil Engineering (Construction Engineering and Management) from Chalmers University of Technology, Sweden; and a PhD in Civil Engineering from the University of the Witwatersrand (South Africa). Prof Ngowi's research interests are multi-disciplinary and they include among others engineering, the built environment, human capital, the role of universities in the emerging technologies (fourth industrial revolution technologies), sustainable development and circular economy. He has an extensive record in human capacity development having produced technicians and degree graduates as well as supervising 21 masters and PhD students. Some of these students proceeded with their doctoral studies at leading universities such as MIT and Princeton in the USA and Cambridge in the UK. I have published over 90 papers in journals, proceedings and book chapters. In addition, he is a co-Chief Editor of the Journal of Construction in Developing Countries (JCDC); Deputy Editor of the Journal of Built Environment and Asset Management (BEPAM); and a Reviews Editor of the Botswana Journal of Technology (BJT).
